

III. TELECOMMUNICATIONS

Ethiopian Telecommunication Corporation (ETC), the state-owned telecom company provides national and international telecommunications services using various media of communication such as Satellite, Microwave Digital Radio Multi-access System (DRMAS), VSAT, UHF, VHF, Long Line and HF Radio. Currently, ETC is serving the public with its 919 public stations and exchanges, which showed 1.7 percent annual growth over the previous year. Consequently, the total number of fixed telephone subscription (residential, business, government and others) has increased from 725,046 in 2005/06 to 880,088 in 2006/07 revealing 21.4 percent annual increase. The number of waiting list for fixed telephone subscribers, however, has decreased by 75.8 percent from 56,053 in 2005/06 to 13,579 in the review year (Table 3.1).

At the same time, the number of mobile subscribers reached 1,208,498 demonstrating 39.4 percent growth over the previous year level of 866,700 subscribers.

In a related development, the number of Internet subscription went up from 25,724 in 2005/06 to 31,400 in the review year registering 22.1 percent increase.

Reflecting the increased performance in fixed telephone, mobile and Internet subscription, the country's telecommunication penetration rate (Tele-density excluding mobile or the number of telephone subscribers per 100 inhabitants) has increased from 0.98 in 2005/06 to 1.16 in 2006/07. The penetration rate was higher (2.73 per 100 inhabitants) when mobile subscriptions are included.

With respect to telephone traffic, the registered domestic traffic picked up by 9.6 percent from 2,475.56 million pulses in 2005/06 to 2,714.31 million pulses in 2006/07. Meanwhile, the out-going international telephone traffic calls have declined from 11.48 million in 2005/06 to 5.73 million in 2006/07.

In the Country's five year development plan, (PASDEP), it is planned to increase

the number of fixed line subscribers from 830,000 in 2005/06 to 3.2 million by the end of 2009/10. The number of Mobile subscribers and internet users, is also expected to pick up to a respective 6.76 million and 193,100 by the end of the plan period from 1.465 million and 48,970 in 2005/06.

Note:

- Average annual growth rate is computed for the years 1992/93-2006/07 E.F.Y.

*The traffic of CDR-10 and AXE-10 exchanges measured in pulses whereas the traffic of the remaining exchanges measures in CDR.

-Figures in bracket in the annual growth column show declines.
